My Friend's Favourite TV Programmes

Today I interviewed my classmate Tony to find out what kinds of TV programmes he likes and doesn't like.

He likes documentaries very much because he thinks they're informative and exciting. He can learn many things and broaden his horizon. They are about history and science. They are very detailed. He likes

nature programmes too because he thinks they're informative and interesting. He can learn about the wild animals. He likes marine

animals such as sharks. He likes the adventures of

the hosts.

He doesn't like the news or weather reports because he thinks they're boring and scary. He is not interested in the news.

The weather reports are wrong sometimes. He doesn't like travel programmes either because he thinks they're boring. He can't see the places he'd like to go. He doesn't have money for traveling.
