

P.4 English Enhancement

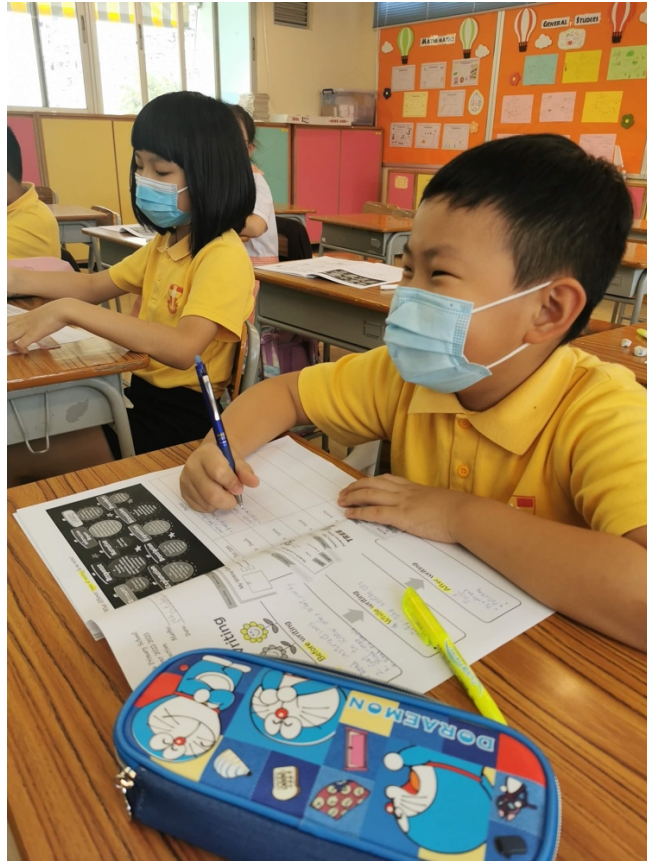

To equip our students to be proficient and confident English-language users, we embed all the four language aspects, i.e. listening, speaking, reading and writing, into our Enhancement program this year.

Every lesson starts with listening records. Amusing songs were shortlisted and students learn more colloquial and authentic phrases and vocabulary from them.

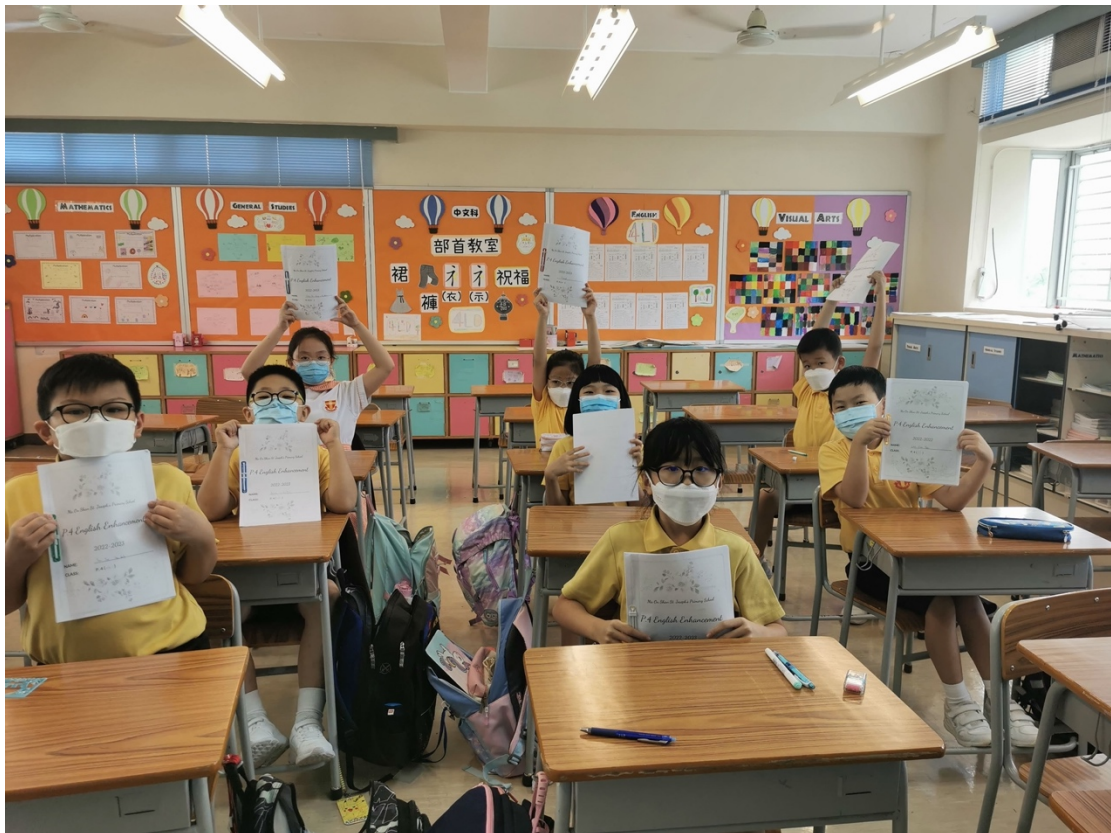

Employing various eLearning applications, students read sample texts and learn different writing strategies. After gathering all the fruitful inputs, students produce their high-quality work.

Learn by listening to amusing songs

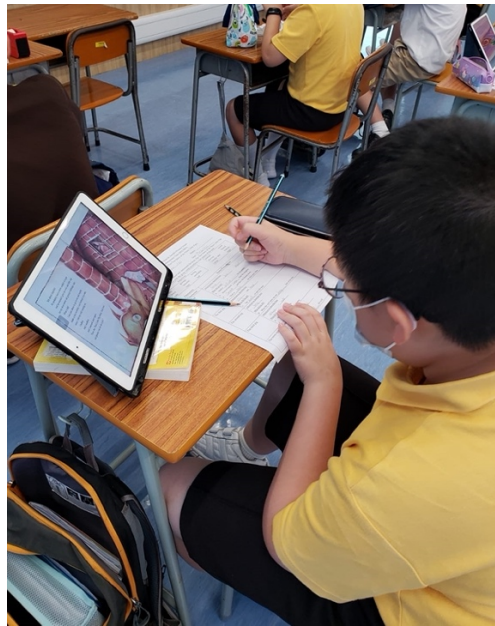

Quick! Jot down the useful notes!

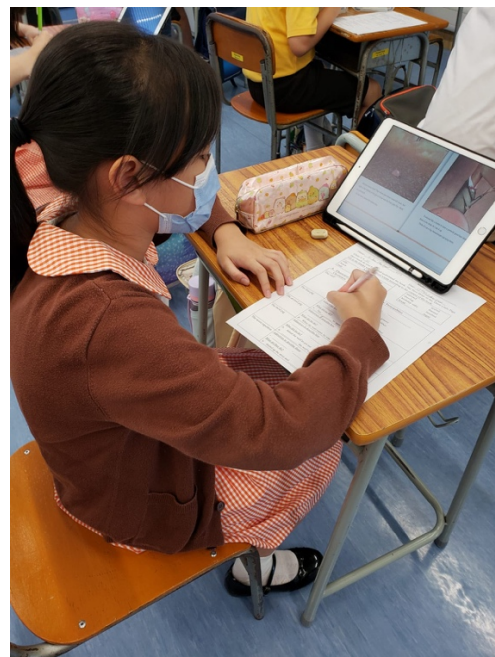

We are great writers!

P.5 English Enhancement

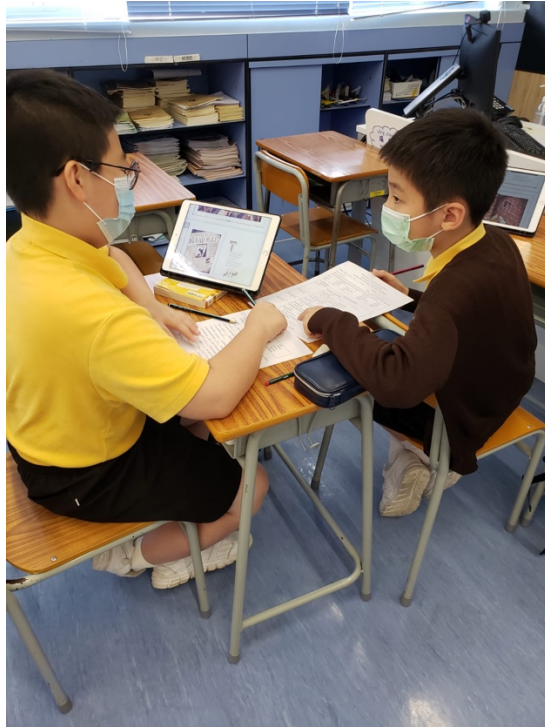

In order to deepen students' learning and nurture them to be confident and enthusiastic writers, the P5 English Enhancement Class focuses on reading and writing. Reading not only can expand ones' vocabulary, but also can inspire new ideas. Therefore, the teaching of writing in our class often starts with reading books. Students enjoyed the books chosen by the teacher and they tried to use the techniques learnt to create their own stories.

How did the writer change this classic fairy tale?

What should I write for my story?

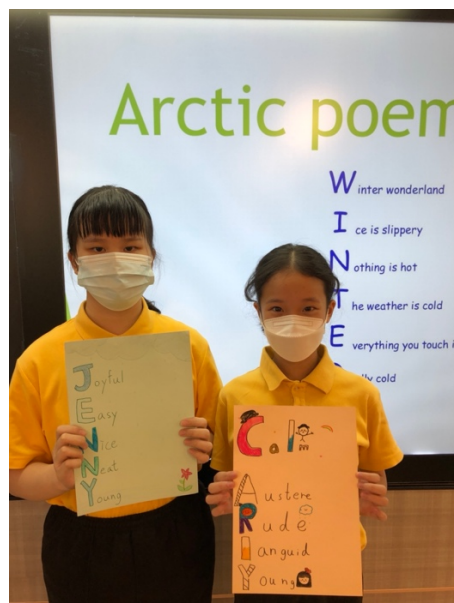

Let's get some ideas for our stories.

P.6 English Enhancement

The English Enhancement Class for Primary 6 students aims to strengthen students' speaking and writing skills. Students are involved in different activities and group discussions to enhance their communication skills. They share their ideas under an authentic context. Peer support and evaluation also foster their learning and motivation. Besides, students learn how to organize their speech and deliver it soundly during class. They practise different presentation skills and techniques. They increase their level of confidence and performance steadily.

Hello, everyone!

We love our poems.

We can be little poets.

I enjoy writing my story!
